Yad Dhaliwal  
Sr. Recruiter  
Prodigy Education

Re: Full Stack Developer, Education

Dear Yad Dhaliwal,

I am excited to submit my application for the Full Stack Developer (Memberships) role at Prodigy Education position you advertised on the Prodigy Game career section. As a current student in Advanced college Diploma from George Brown College in Computer Programming Analyst program I am confident I can contribute to improvement in Prodigy's suite of web applications through my good ideas, passion for learning and analytical and creative thinking process.

Throughout my program, I have gained A good understanding of ES6, HTML5, JavaScript and various other programming languages both for front end and backend. Through out many school projects I have created CRUD application which implemented the best practice for relational databases such as Oracle, and MSSQL and MySQL and non relational NOSQL database through Nodejs and Google Firebase. Furthermore, I have played the role of the team lead in vast majority of projects and guided other team mates to design better performance and easy to maintain coding standard through working in an agile environment. As a person who believes in the philosophy that learning is a continuous learning process, I have taken advanced courses in flask, React, Django and Entity frame core, React, Node.js and unit testing outside my program to further develop my skill as a Full Stack Developer.

One of the biggest factors which draws me to be a potential future Full Stack developer at Prodigy game is mission statement. As a student myself who suffers with ADHD and learning disability, I understand the importance of diverse learning strategies. In my educational journey I have used educational software such Kurzweil during my academic studies and developed my own learning strategies overcome my struggle and successfully pursue my education allowed me to be in Deans List. Specially during pandemic, the demands have risen for accessible learning from home. Thus, as an avid gamer, user of accessible learning software my self I want to help with development of educational games which will help every student in the world love learning.

Thank you for your time. I look forward to hearing from you to set up an interview for a Full Stack developer position at Prodigy game. With my desire for continuous learning and software development background I am hoping I can further contribute toward Prodigy Game contribution for developing fun accessible educational related software. You can reach me at [Nafis.Ishtiaque@georgebrown.ca](mailto:Nafis.Ishtiaque@georgebrown.ca) and (647)721-3768.

Sincerely

Nafis Ishtiaque
